SUMMARY

Computer Science undergraduate with strong foundations in Machine Learning, Deep Learning, Data Structures & Algorithms, and Python. Experienced in developing end-to-end AI and web applications using Python, Streamlit, Flask, SQL, and Scikit-learn. Passionate about solving real-world problems through data-driven solutions and continuously improving software engineering skills.

EDUCATION

GL Bajaj Institute of Technology and Management

B.Tech in Computer Science

2023 – 2027

CGPA: 7.4

TECHNICAL SKILLS

- **Languages:** Python, C++, C, SQL
- **Machine Learning:** Scikit-learn, TensorFlow, PyTorch, NLP, Data Preprocessing, Model Evaluation
- **Web Development:** Flask, Streamlit, HTML, CSS, JavaScript
- **Databases:** SQLite, MySQL
- **Tools:** Git, GitHub, VS Code, Google Colab

PROJECTS

Movie Recommendation System

Jan 2026 – Feb 2026

Python, Pandas, NumPy, Scikit-learn, Streamlit

- Developed a content-based movie recommendation engine using machine learning techniques and cosine similarity.
- Processed movie metadata including genres, keywords, and ratings to generate feature vectors for recommendations.
- Built an interactive Streamlit application that provides personalized movie recommendations through a user-friendly interface.
- Integrated TMDB API to retrieve movie posters and metadata for an improved user experience.

Expense Tracker Web Application

Apr 2026 – May 2026

Python, Flask, SQLite, HTML, CSS

- Designed and developed a full-stack expense tracking application for recording and managing daily expenses.
- Implemented CRUD functionality with SQLite database integration for secure data storage and retrieval.
- Categorized transactions and generated spending summaries to help users analyze budgeting patterns.
- Designed responsive user interfaces using HTML and CSS with Flask-based backend architecture.

RELEVANT COURSEWORK

Data Structures & Algorithms • Database Management Systems • Operating Systems •
Computer Networks • Machine Learning

ACHIEVEMENTS

- Actively strengthening problem-solving skills through Data Structures and Algorithms practice.
- Continuously building AI and full-stack projects to develop production-ready software engineering skills.
